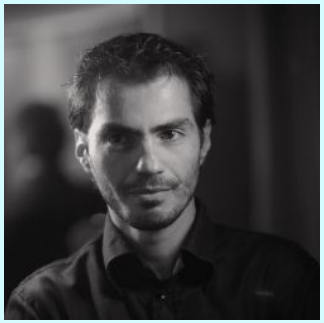
History

- Media Manager didn’t get updated with new technologies since probably Joomla 1.5
- Different teams and people were working on it
- The current team started to work on it in Vienna in December 2016
- Decision was made to start on a clean base with modern technologies

Team members



DIGITALPEAK

Project information

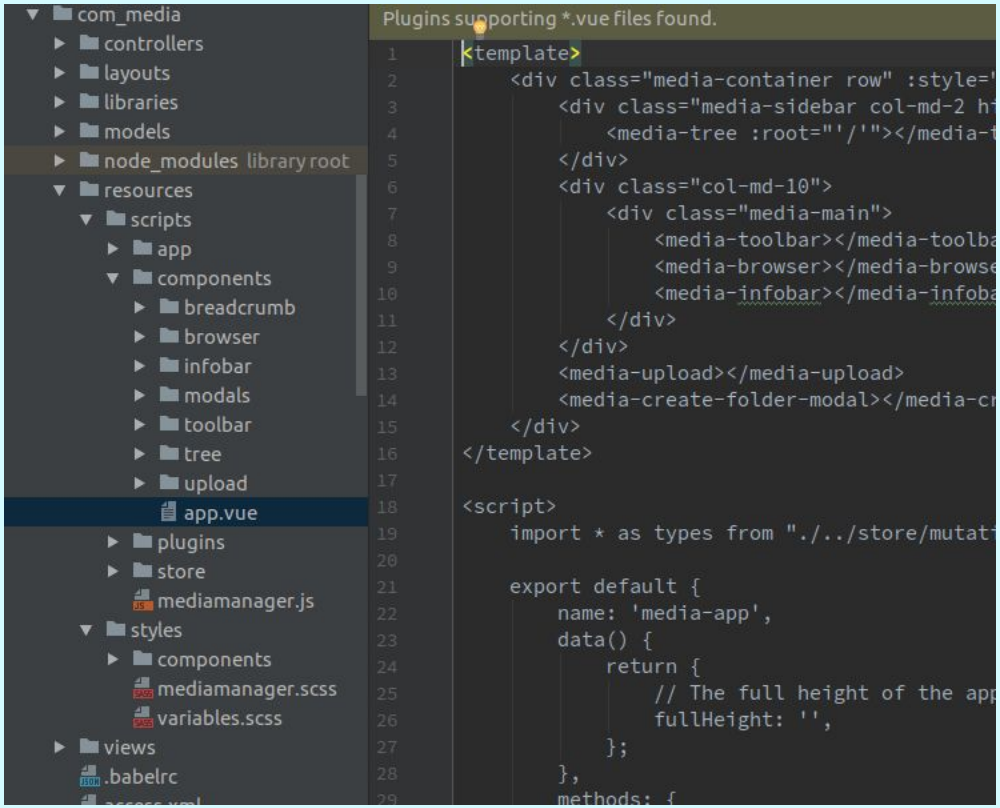
- The code repository can be found on Github
  https://github.com/joomla-projects/media-manager-improvement
- The team is also listed on the volunteers portal, where we publish regularly reports
  https://volunteers.joomla.org/teams/new-media-manager-team
- Currently under heavy development
- Will be part of Joomla 4.0
- PR’s are always welcome

Roadmap

- The roadmap is listed on our wiki
  https://github.com/joomla-projects/media-manager-improvement/wiki
- Currently we are finalizing milestone 1
- Features of milestone 1 are:
  - New list view
  - Image editing
  - Drag and Drop
  - Enhanced media field
- After JAB we start planning milestone 2

Architecture

- Front end is javascript based with vue.js
- Front end interacts with back end through a rest based API endpoint
- Edit functionality can be extended through Joomla plugins
- Styling is done through SASS



Demo

Getting involved

- We have a backlog of issues to do for milestone 1 https://github.com/joomla-projects/media-manager-improvement/issues
- If you have some coding skills, don't hesitate to pick and create a pr
